HB 4949

My wife Charlene Marie Morris and I Chris Jerome Morris and we live to love everyone even our enemies. So we humbly ask each of you to think if the baby in the womb was you do you think it is ok that someone other than the Lord has the right to kill you limb by limb because they do not want to take responsibility for their sex act. In the case of rape I can understand a little why. But to not take responsibility for your own actions if there is not a danger to your life is an abomination. believe this HB4949 is a travesty to most women and men in Michigan and all children and unborn babies. Let them have life leave them first an adoption. It is murder to take the life of a person. Has been since the U.S.A. was formed. We were founded on the principles of God who commands thou shalt not kill. How anyone could reduce a baby to become a pile of trash to discard at their pleasure or opinion is inhumane. On face it appears a prosecutor's office if they take action against this Bill would be liable to lawsuits is another slap in the face or should I say death sentence. It is time we wake up to this some of this new generations evilness. If it isn't their way then they want you to have no rights. It is up to you older representatives to use your wisdom to poke holes in their youthfulness. What is worse is that we have governmental officials' people who should be educated enough to know the difference are just going through the motions and passing bills they could not have read with an open mind. God says to love everyone even the unborn. They are not enemies or strangers they are our children loving and kind the way God made them. And know Chris and Charlene will pray for all of you to look deep inside yourselves to make the right decision on whether a baby should also have a right to life.

Chris and Charlene Morris
